

EMAN QAZI

FULL STACK DEVELOPER • AI INTEGRATED WEB AND MOBILE APPLICATIONS • AUTOMATION ENGINEER

+92 3097167600 emanqazi786@gmail.com linkedin.com/in/eman-qazi github.com/EmanQazii

OBJECTIVE

Full-stack developer and automation engineer with hands-on experience shipping AI-integrated mobile and web applications, computer vision models, and LLM-driven automation pipelines. Comfortable owning a project end-to-end: data collection, backend/API design, model training, and UI delivery.

EXPERIENCE

Mobile App Developer (Frontend) - Client Project / Nov 25-Feb 26

- Delivered a chatbot-driven skincare app with personalized product recommendations on user inputs.
- Designed responsive UI and integrated database for efficient data flow and tailored user experience

PROJECTS

Dietary Habit Tracker - AI-Powered Nutrition App

Flutter • FastAPI • PostgreSQL • Custom CV Model • USDA FoodData API

- Built a full-stack nutrition tracking application using a custom MobileNetV2 food classifier model, FastAPI, and PostgreSQL, supporting image-based food recognition and USDA-powered calorie estimation.
- Developed analytics modules for calorie tracking, meal history, dietary trends, and nutrition insights through secure APIs and optimized database design.
- <https://github.com/EmanQazii/FoodDietTracker>

Cure Connect - Healthcare Mobile App

Flutter • Firebase

- Developed a dual-role healthcare platform enabling appointment management, e-prescriptions, diagnostic records, and test orders with real-time synchronization between doctors and patients.
- Built patient-facing features including doctor discovery, medication adherence tracking with reminders, and centralized medical history across multiple hospitals.
- <https://github.com/EmanQazii/ClinincBookingApp>

EDUCATION

Bachelor of Science in Computer Science(BSCS)

Air University
2023 - 2027
CGPA: 3.81

SKILLS

Languages:

- Python, JavaScript, TypeScript, Dart, C++, C#

Web & App Development:

- Flutter (Mobile App Development), Full-Stack Development (Frontend & Backend), HTML, CSS, FastAPI

Automation & Data:

- n8n Workflow Automation, API Integration, Web Scraping (Selenium, BeautifulSoup), Data Analysis (Pandas), Data Cleaning & Processing

AI/ML:

- Image Classification (Custom-Trained Models), Predictive Modeling, Scikit-learn, LLM API Integration, Agentic AI Workflows, AI-Powered Application Development

CERTIFICATIONS

- Pandas, Data Visualization**
Issued by: Kaggle
- MS Word Associate (Word and Word 2019)**
Issued by: Microsoft

PROJECTS

Product Insights & Price Tracker

TypeScript • Node.js • Python (Selenium, BeautifulSoup)

- Built a cross-platform price comparison tool aggregating electronics listings scraped from Amazon and Daraz, unifying entries to support filtering by price, rating, and category.
- Automated scheduled scraping via GitHub Actions and engineered price-history matching logic to track trend analytics over time despite frequent upstream site changes.
- <https://bazaarlenspriceanalysisplatform.netlify.app/>

n8n Hiring Workflow Automation

n8n • Mistral AI API • Google Calendar API

- Designed an agentic resume-screening pipeline using n8n and the Mistral AI API to parse, score, and route candidates across two hiring tracks (SWE and Business Manager).
- Automated decision-based email dispatch and Google Calendar interview scheduling triggered directly from AI-generated candidate scores.
- <https://github.com/EmanQazii/Automated-Hiring-Workflow-n8n>

Amazon Product Scraper

Python • Selenium • BeautifulSoup • openpyxl

- Built a terminal-based scraper that takes a product category as input and extracts listings (name, description, price, product link) across multiple Amazon search-result pages.
- Parsed and exported structured results to Excel using openpyxl for offline review and analysis.
- <https://github.com/EmanQazii/Amazon-Scrapping>
